Volume 241 No. 1

10th International Symposium on Iron Nutrition and Interactions in Plants

Guest editors:
Zed Rengel & Michael Grusak

Preface vii

Is a ferroxidase involved in the high-affinity iron uptake in *Chlamydomonas reinhardtii*?
A. Herbik, S. Haebel and T.J. Buckhout 1–9

Localization of the plasma membrane H^+-ATPase in Fe-deficient cucumber roots by immunodetection
M. Dell'Orto, L. Pirovano, J.M. Villalba, J.A. González-Reyes and G. Zocchi 11–17

Intra- and intercellular iron trafficking and subcellular compartmentation within roots
U.W. Stephan 19–25

Reduction and transport of Fe from siderophores
G.V. Johnson, A. Lopez and N. La Valle Foster 27–33

Enzymatic responses of cucumber roots to different levels of Fe supply
F. Agnolon, S. Santi, Z. Varanini and R. Pinton 35–41

Increases in phospho*enol*pyruvate carboxylase activity in iron-deficient sugar beet roots: Analysis of spatial localization and post-translational modification
S. Andaluz, A.-F. López-Millán, M.L. Peleato, J. Abadía and A. Abadía 43–48

A comparison of ferric-chelate reductase and chlorophyll and growth ratios as indices of selection of quince, pear and olive genotypes under iron deficiency stress
M.D. de la Guardia and E. Alcántara 49–56

Quantitative traits associated with adaptation of three barley (*Hordeum vulgare* L) cultivars to suboptimal iron supply
D.E. Crowley, C.L. Wu, D. Gries, S. Brünn and D.R. Parker 57–65

Does high bicarbonate supply to roots change availability of iron in the leaf apoplast?
M. Nikolic and V. Römheld 67–74

Organic acids and Fe deficiency: a review
J. Abadía, A.-F. López-Millán, A. Rombolà and A. Abadía **75–86**

Modulation of the root epidermal phenotype by hormones, inhibitors and iron regime
A. Schikora and W. Schmidt **87–96**

Physiological root responses of iron deficiency susceptible and tolerant tomato genotypes and their reciprocal F_1 hybrids
H.Y. Dasgan, V. Römheld, I. Cakmak and K. Abak **97–104**

Phytosiderophore release from nodal, primary, and complete root systems in maize
M.L. Bernards, V.D. Jolley, W.B. Stevens and G.W. Hergert **105–113**

Nicotianamine synthase: Gene isolation, gene transfer and application for the manipulation of plant iron assimilation
D. Douchkov, A. Herbik, G. Koch, H.-P. Mock, M. Melzer, U.W. Stephan and H. Bäumlein **115–119**

Uptake of ^{59}Fe from soluble ^{59}Fe-humate complexes by cucumber and barley plants
S. Cesco, M. Nikolic, V. Römheld, Z. Varanini and R. Pinton **121–128**

Reactivity of synthetic Fe chelates with soils and soil components
A. Álvarez-Fernández, M.A. Sierra and J.J. Lucena **129–137**

Long-term effectiveness of vivianite in reducing iron chlorosis in olive trees
R. Rosado, M.C. del Campillo, M.A. Martínez, V. Barrón and J. Torrent **139–144**

Fe enriched biosolids as fertilizers for orange and peach trees grown in field conditions
A. Pérez-Sanz, A. Álvarez-Férnandez, T. Casero, F. Legaz and J.J. Lucena **145–153**

Volume 241 No. 2

Stabilization mechanisms of soil organic matter: Implications for C-saturation of soils
J. Six, R.T. Conant, E.A. Paul, and K. Paustian **155–176**

Are penetrometer measurements useful in predicting emergence of sugar beet (*Beta vulgaris L.*) seedlings through a crust?
J.-N. Aubertot, C. Dürr, G. Richard, N. Souty and Y. Duval **177–186**

Surface colonization of lodgepole pine (*Pinus contorta* var. *latifolia* [Dougl. Engelm.]) roots by *Pseudomonas fluorescens* and *Paenibacillus polymyxa* under gnotobiotic conditions
E. Bent, C. Breuil, S. Enebak and C.P. Chanway **187–196**

Monitoring of water from the underground to the tree: first results with a new sap extractor on a riparian woodland
L. Lambs and M. Berthelot **197–207**

Spatial and temporal variation in citrate and malate exudation and tissue concentration as affected by P stress in roots of white lupin
E. Peñaloza, L.J. Corcuera and J. Martinez **209–221**

The contribution of nitrogen by promiscuous soybeans to maize based cropping the moist savanna of Nigeria
N. Sanginga, J. Okogun, B. Vanlauwe and K. Dashiell **223–231**

Influence of soil depth on the decomposition of *Bouteloua gracilis* roots in the short-grass steppe
R.A. Gill and I.C. Burke **233–242**

High temperatures are not responsible for lack of infection of citrus roots by *Phytophthora citrophthora* during the summer, but suppressive soil microorganisms may inhibit infection by *P. citrophthora*
M.F. Dirac and J.A. Menge **243–249**

Uptake and transport of foliar applied zinc (^{65}Zn) in bread and durum wheat cultivars differing in zinc efficiency
B. Erenoglu, M. Nikolic, V. Römheld and I. Cakmak **251–257**

The fate of carbon and fertiliser nitrogen when dryland wheat is grown in monoliths of duplex soil
B.J. Atwell, I.R.P. Fillery, K.J. McInnes and A.J.M. Smucker **259–269**

Root bacteria from nematicidal plants and their biocontrol potential against trichodorid nematodes in potato
V. Insunza, S. Alström and K.B. Eriksson **271–278**

Spatial patterns of surface soil properties and vegetation in a Mediterranean semi-arid steppe
F.T. Maestre and J. Cortina **279–291**

Volume contents **293–295**

Author index **297**
